ENCLOSURES (NO. & TYPE)

REMARKS

SOURCE

25X1X

27 June 1949

1. There was no flying at the STAAKEN (N 53/Z 65) airfield but 16 single and two-seat fighters with radial engines were parked in front of the hangars.

12 July 1949

2. There was no flying at the STAAKEN airfield. Only two silvery twin-engine aircraft with four-bladed propellers were parked on the southern field border. One of these aircraft had three windows, a single landing gear, wings slightly dihedral and a rounded-off nose compartment. The other aircraft had five windows, double landing gear and a glazed nose compartment.
3. A radio station, composed of two radio trucks and a covered set, probably a searchlight, was located west of the airfield. Three radio trucks and two covered sets were previously located there.

25X1A Comments:

a. The report confirms the previously assumed occupation of the STAAKEN airfield by one fighter regiment, equipped with LA-7s or LA-9s. Apparently some Yak-11s (two-seat fighters with radial engine) used for training purposes are also assigned to this fighter regiment, the numerical designation of which is still unknown.

b. The two twin-engine aircraft observed at the STAAKEN airfield on 12 July 1949 cannot be determined from the given data. The aircraft with a double landing gear possibly is a IL-12, since no other twin-engine aircraft type with a

double landing gear is known. According to previous reports, however, the IL-12 has no glazed nose compartments.

c. The existence of a radio station west of the airfield was observed by another source on 26 May 1949. According to the latter source, the covered set at the radio station was a radio location gear.
